

June 2021

Tēnā koutou

Welcome to our June newsletter with a wrap-up of the World Metrology Day celebrations that we held on 20 May. We also highlight our training courses which are being held in Lower Hutt and Auckland in August. Don't delay your registration, as early bird rates apply until 12 July.

In June we welcomed our new staff, Stefaan Janssens in the Temperature and Humidity team and Lisa Castle as Science Support Coordinator. And we've just released a new Electrical Technical Guide.

Ngā mihi
Cliff Hastings
Director, MSL

Training courses - early bird rates ending soon

Don't delay - register now for the MSL training courses happening in Lower Hutt and Auckland in August. Following the cancellation of these courses in 2020 due to COVID-19, we expect there to be a higher than usual demand for training. Our recent training course review and stakeholder feedback highlighted that our face to face, hands on, practical courses are extremely valued and the preferred option to upskill laboratory staff. Check out the [Training page](#) for the course schedule and **book now** as early bird rates end on 12 July.

World Metrology Day event

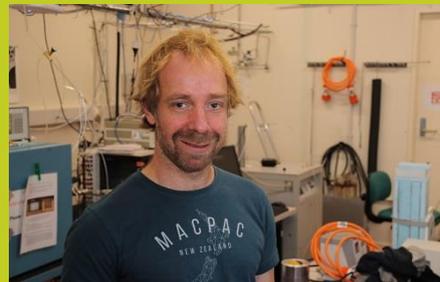

We would like to thank those who attended our event on 20 May. It was a very full day that started at 6:15 am with the dawn blessing of our new building. That was followed by an official opening and the chance to welcome guests through the new Electrical and Temperature laboratories for the very first time. The rest of the day was packed with some great speakers and provided the opportunity for our team to connect with our valued stakeholders. There were many moments captured on camera that you can now see on the [event page](#).

Staff changes

MSL welcomed two new faces to the team this month. [Stefaan Janssens](#) has moved over from Callaghan Innovation R&D Solutions into the MSL Humidity team. Having worked with our team on a number of occasions for many years, Stefaan is very familiar with our capability and brings a wealth of knowledge.

[Lisa Castle](#) joins our management team in the role of Science Support Coordinator, taking over from Cynthia Lendrum who has moved into the role of Manager, Temperature and Light. Lisa is also an internal Callaghan Innovation movement, having served as Receptionist and front office manager for many years.

New Technical Guide

TG.37 Electricity Metering: Current Transformers

This technical guide offers advice on calibrating current transformers (CTs) used for metering electricity.

Download this now from our Resources page (the Electrical Technical Guides section).
